SUMMARY

Software Systems Development Graduate, skilled in Web application development and Cloud Computing. Academic training in AWS Cloud with foundational knowledge of cloud infrastructure and deployment concepts. Adept at building clean, responsive, and functional applications through academic and personal projects. Seeking the opportunity for a role to apply my technical skills in real-world development environments.

WORK EXPERIENCE

Frontend Developer Intern, ByteToc Computing

Nov 2022 – Feb 2023

- Designed responsive website layouts (**HTML & CSS**) for client projects.
- Developed databases and functionalities with **PHP**.
- Assisted in resolving errors during testing phase.

Software QA Tester Intern, Cardbiz Group of Companies

June 2025 – Dec 2025

- Created **test cases** and performed **functional testing**, **smoke testing** and **retesting** for multiple client projects using tools such as **QASE** and **ZOHO**.
- Performed **load/performance testing** using **Apache JMeter**.
- Created and update documents such as **User Manuals**, **User Requirement Specification (URS)**, **UAT Reports**, and **flowcharts**.
- Gained hands-on experience in software testing, project coordination and technical documentation

Part-Time Event Staff. Timeout Solutions

2023 – 2024

- Assisted in the setup, coordination, and execution of events, ensuring smooth operations.
- Worked in dynamic and fast-paced environments, adapting to changing needs

RELEVANT PROJECTS

Cloud Deployed URL Shortener

- Full-stack link-shortening service with JWT authentication and containerizing services using Docker and AWS ECR.
- Deployed production infrastructure on AWS EC2 and RDS (MySQL), enforcing secure cloud practices via least-privilege AWS IAM roles.
- Automated continuous deployment with Github Actions.
- TypeScript, MySQL, Next.js, Node.js, Docker, AWS EC2, AWS RDS, AWS ECR, AWS IAM, Github Actions, Nginx
- Project Link : <https://jeremiah-url-shortener.duckdns.org/login>

Serverless Cloud Portfolio

- Built a serverless static portfolio site distributed globally via AWS CloudFront and hosted on AWS S3 for low-latency delivery
- Configured custom domain SSL termination using AWS Certificate Manager (ACM) and automated deployment via AWS IAM CI/CD policies and GitHub Actions.
- AWS S3, AWS CloudFront, Route 53, AWS ACM, AWS IAM, Github Actions, HTML/CSS/Javascript
- Project Link : <https://www.jeremiahruben.my/>

Fitness & Wellness Management Platform

- Role-based platform supporting automated class scheduling, tiered membership access control, and trainer attendance tracking.
- Containerized multi-service environment (Laravel API, Frontend, Backend, Redis, MySQL) with Docker for consistent local development and staging.
- Docker, PHP, Laravel, Next.js, React, TypeScript, Redis, MySQL

Digital Restaurant QR Menu System

- Developed a responsive web app enabling diners to access digital menu via dynamically generated QR codes, paired with a secure merchant dashboard.
- Built a modular backend with NestJS and PostgreSQL, integrating Cloudinary for asset(images) optimization.
- NestJS, Next.js, TypeScript, PostgreSQL (Neon), Cloudinary, REST API, Vercel, Render
- Project Link : <https://qr-menu-system-bice.vercel.app/menu>

EDUCATION

Bachelor of Information Technology in Software Systems Development Nov 2023– May 2026

Tunku Abdul Rahman University of Management and Technology

- Final CGPA: 3.23

Diploma in Information Technology

June 2021 – June 2023

Tunku Abdul Rahman University of Management and Technology

- Final CGPA: 3.25

KEY SKILLS

- | | | |
|-----------------------|-------------------|---------------------------|
| • PHP, JAVA | • Cloud Computing | • Functional and |
| • React,TypeScript | • Linux | Performance Testing |
| • Laravel | • Networking | • Technical Documentation |
| • MySQL, Redis | • Docker | |
| • Tailwind CSS | • AWS | |
| • Next.js, Node.js | • GitHub Actions | |
| • HTML/CSS/JavaScript | | |
